

From the TOONS' WORLD

Cartoonists have their own way of
presenting news to the world... Here's
encapsulating the news that made
headlines globally from an
illustrator's eye...

is not sedition!

AFGHAN TALKS OFF

After months of speculation, the Afghan peace talks are off. US President Donald Trump reportedly took the decision after Taliban claimed responsibility for a recent attack in Kabul that killed an American soldier. Back channel negotiations between the US and Afghan Islamists had been going on since late last year.

UNIFYING MOONSHOT

Isro's effort to ensure India became only the fourth nation to successfully carry out a controlled landing on the surface of the moon is perhaps our most unifying moment in recent times. The last stages of the six week journey to the lunar surface were a riveting watch. Eventually, Isro lost communication with the lander (Vikram) a mere 2.1 km from the surface. But it would be inaccurate to label this mission a failure. The orbiter, one of three parts of the Chandrayaan-2 stack, continues to function. Over the next few years, this orbiter will keep sending back pictures that will form the basis of subsequent analysis. More important, Isro is now focussing on many other missions to the outer space including Gaganyaan in 2020.

MEDIOCRITY RULES

Once again exemplifying the lacklustre quality of education in the country, no Indian university has featured in the top 300 in the latest Times Higher Education World University Rankings. In fact, the highest ranked Indian varsity - IISc Bangalore has also failed to make a mark
