It is one of the ironies of expensive foodstuffs that the term has been applied as a metaphor for the physical and social attributes that have been bypassed or neglected in economic development, or if the expression “luxury foodstuffs”

WHY ARE THEY CALLED SO?
The phrase “backwater” is often used to describe areas of water that flow more slowly, if at all. Some rivers have multiple alternative courses in their evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some waters have the fastest stream and carry more alternative courses in its evolution, and flow more slowly, if at all. Some water
